

ANTI-CORRUPTION ACTION PLAN

Corruption has consequences, and it's costing the American people. Politicians get rich off prediction markets while costs go up for working families, tax dollars are wasted on no-bid contracts secured with bribes, and voting rights are ripped up for political advantage – greenlit by an unaccountable Supreme Court.

Americans deserve government officials who work for the people, not themselves. That's why New Dems are committed to rooting out corruption across the government.

END PAY-TO-PLAY & POLITICS FOR PROFIT

- **Crack down on insider trading** by prohibiting individual stock trading for all federal elected officials, including the President, and their families and by banning prediction market bets for all government employees.
- **Eliminate crypto scams** by banning senior federal and elected officials – including the President – and their families from issuing or endorsing digital securities like “memecoins.”
- **End pay-to-play politics** by making it illegal to invest in private companies in which elected officials and their families have a financial interest.
- **Bar elected officials and their families** from investing in private companies that earn income from government contracts.

SAFEGUARD VOTING RIGHTS

- **Advance real campaign finance reform** and increase transparency, including by reversing Citizens United to get big money out of politics.
- **Restore the protections of the Voting Rights Act** to fight back against Republican efforts to kick millions of Americans off the voting rolls.
- **Protect the authority of state governments** to administer elections and safeguard access to legitimate voting methods like mail-in voting.

RESTORE CHECKS & BALANCES

- **Defend Americans from an out-of-control executive:** reassert Congress' power over taxes, trade, and war to prevent illegal tariffs and unauthorized, costly conflicts.
- **Block the Administration from strong-arming independent agencies** like the Department of Justice (DOJ), Federal Reserve, Securities and Exchange Commission (SEC), and Federal Trade Commission (FTC).
- **Implement harsh penalties** for an Administration that fails to comply with court orders.

HOLD THE COURTS TO A HIGHER ETHICAL STANDARD

- **Implement and enforce a code of ethics** for all federal judges, including Supreme Court justices.
- **Hold Supreme Court justices to the same gift limits** that apply to executive and legislative branch employees.
- **Establish an independent inspector general** in the judicial branch to investigate misconduct.
